As Product Owner You can Add, Delete, Edit any features from the Product Backlog List

As a Product Owner After Adding all the Features in Backlog List, User can Display the list of Features.

But If User Chooses Release Manager to login, then You can select any number of Features from product backlog list to release Backlog list

As a Release Manager, User can also Delete and Select any Feature From Feature Backlog to Release Backlog List.

After Selecting Features, The Release manager can Display the Reports
